

What is Career Technical Education?

The SUHSD Career Technical Education (CTE) program is designed to provide all students with opportunities for enhanced learning experiences, preparation for future career decisions and a realistic view of the world of work.

Courses in a variety of Industry Sectors are offered that satisfy the Practical Vocational Arts requirement for high school graduation. Work Experience offers a combination of classroom learning and on the job training to 11th and 12th grade students who are employed.

Instruction in elective CTE Courses provides students with the academic knowledge and skills needed to prepare for post-secondary education. Many of the CTE courses are articulated with Shasta College and offer students an opportunity to earn college credit. Students also receive a strong experience and understanding of all aspects of the industry they are considering for a future career. The competency based applied learning methodology featured in CTE courses contributes to the academic knowledge, problem solving skills, work attitudes, technical skills and general employability skills of each student.
