COMMUNITYCONNECT

Community Connect assists families in accessing services and supports available in Shasta County to relieve life's hardships that impact their student's education. A school-based Community Connect Clinician is available to provide additional support to SUHSD student's and their families. The Clinician can answer questions and provide support based on needs identified by the family.

 **Attendance and SARB**

Community Connect is here to help dismantle barriers contributing to chronic absenteeism by offering school-based support and linkage to community-based services. Select students under a SARB contract may receive more intensive case management support.

 **Behavior and Mental Health**

A school-based Community Connect Clinician can support students and families seeking support finding counseling services, mental health treatment, or alternative solutions to repeated disciplinary action. Referrals to tobacco cessation programs or drug & alcohol education are also available.

 **Homelessness or Hardship**

Homelessness is stressful and isolating. With limited resources, Community Connect aims to develop creative solutions to ease the burden. Support services are available for families experiencing homelessness, food insecurity, or financial hardship.

Contact your school counselor or attendance administrator for a referral to Community Connect

Services are need-based and completely voluntary
